

International artist, Gwen Cates is a contemporary colorist, creating experimental and playful abstract paintings in acrylic, often with collage elements. Her current solo exhibit "Cosmic Adventures" takes us on a colorful journey between worlds.

While viewing her paintings, we are invited to leap into other dimensions and explore a mytho-poetic adventure. From black holes, to new stars, nature collages, to loving between worlds, and horses jumping through astral planes of existence, Gwen Cates never fails to astonish!
